

File compressor

Initial setup of the project:

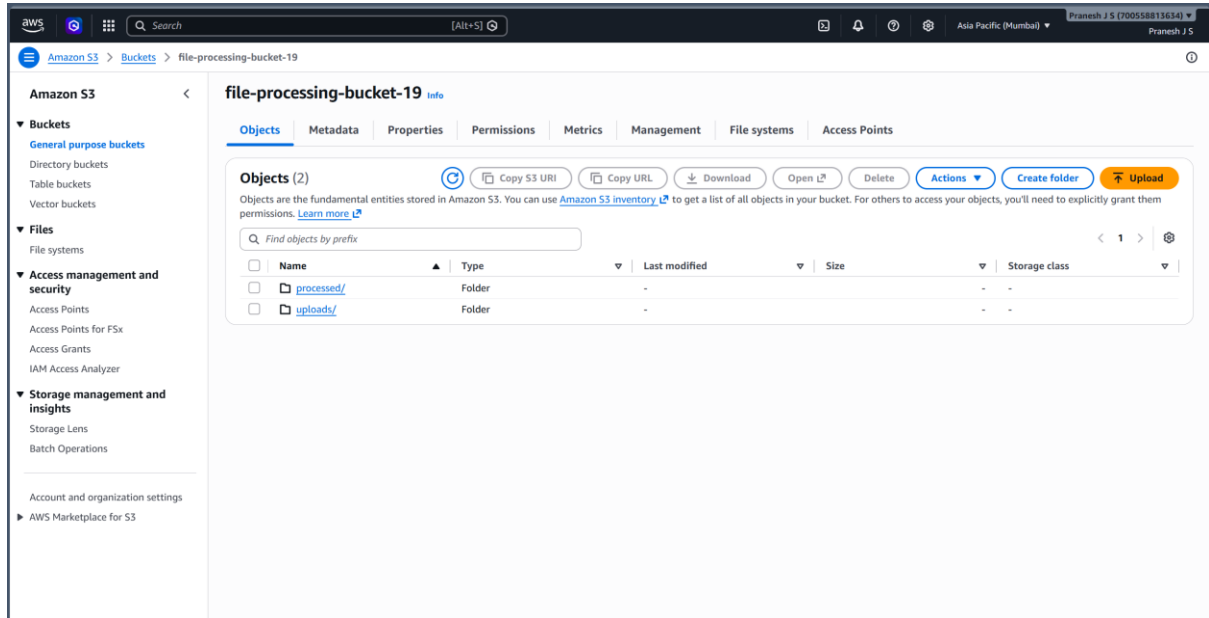

Swagger ui:

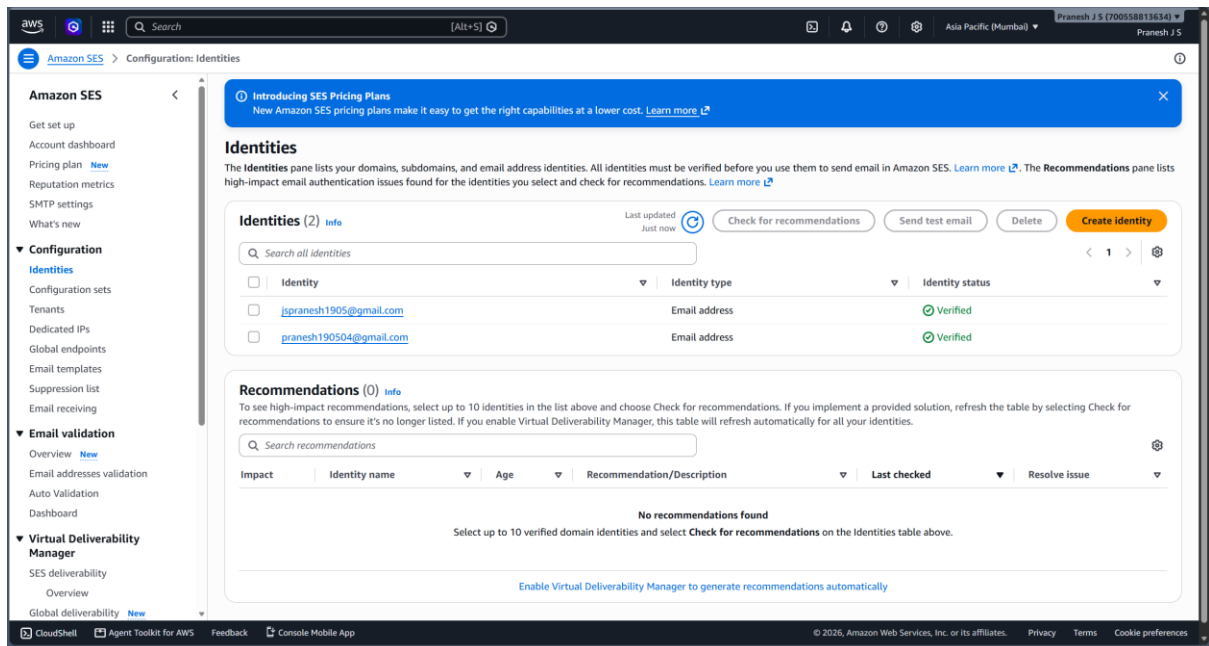

Amazon sqs:

Amazon s3:

Amazon SES:

1.Uploading a file

File Processing API 1.0.0 OAS 3.1
apiopenapi.json
Asynchronous file upload and processing system

Files

POST /files/upload Upload File

Parameters Cancel Reset

No parameters

Request body required multipart/form-data

file required
string Choose File Praveen Internship report.docx

email required
string praveen190504@gmail.com

Execute

Responses

Code	Description	Links
201	Successful Response	No links

Media type application/json
Content type accept header

Example Value Schema

```
{
  "job_id": "string",
  "filename": "string",
  "email": "praveen190504@gmail.com",
  "status": "string",
  "original_s3_key": "string",
  "processed_s3_key": "string",
  "error_message": "string"
}
```

2. processing of the file:

GET /files/{job_id} Get File

Parameters Cancel

Name	Description
job_id required string (path)	5bf713f-0e1c-4a5e-9fee-ed957aaf2d0

Execute Clear

Responses

curl Copy

```
curl -X GET \
  http://localhost:8080/files/5bf713f-0e1c-4a5e-9fee-ed957aaf2d0 \
  -H 'accept: application/json'
```

Request URL

```
http://localhost:8080/files/5bf713f-0e1c-4a5e-9fee-ed957aaf2d0
```

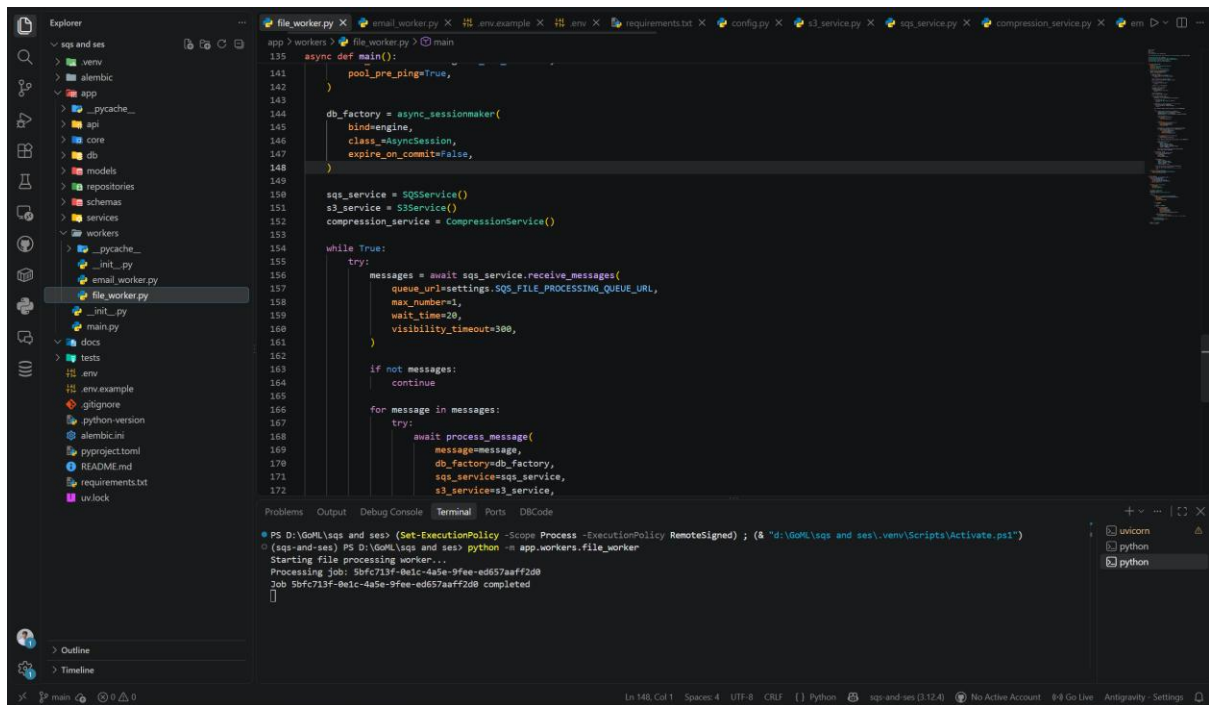

Server response

Code	Details
200	Response body <pre>{ "job_id": "5bf713f-0e1c-4a5e-9fee-ed957aaf2d0", "filename": "Praveen Internship report.docx", "email": "praveen190504@gmail.com", "status": "Processed", "original_s3_key": "uploads/5bf713f-0e1c-4a5e-9fee-ed957aaf2d0/Praveen Internship report.docx", "processed_s3_key": "processed/5bf713f-0e1c-4a5e-9fee-ed957aaf2d0/Praveen Internship report.docx.zip", "error_message": null, "created_at": "2020-09-09T17:31:31.952100", "updated_at": "2020-09-09T17:31:46.366664" }</pre> Download
